Visure Solutions has obtained the Level 2 of the standard ISO/IEC 15504 Certification

Madrid 25 May.- Visure Solutions has obtained the Level 2 of the Norm ISO/IEC 15504 Certification "Information Technology, Software Valuation Process". The use and implantation of this standard will allow us obtaining a significant improvement in the quality of Visure products, innovating in our development processes.

Baldo Rincón, Visure managing director affirms: "This certification is one more step in our bet for the quality and ongoing improvement in our development processes, which undoubtedly will result in a still major quality of our products."

About Visure

Visure Solutions, "The Requirements Company", is the market leader in Requirements Definition and Management.

Requirements are without doubt the most critical element in the development of complex systems and the problems derived from them have a very high incidence in lowering quality and productivity, increasing development costs and, of course, time-to-market.

With IRQA as our centralized requirements platform, Visure offers specialized and innovative solutions that are easy to use in the implementation of efficient processes for the requirements definition and management, and thereby guarantee the highest quality in the development of the products, systems and services of our clients.

IRQA's quality and state-of-the-art features are endorsed by the world's leading organizations. This platform and the deep and wide ranging experience of our people in the development and implementation of requirements solutions are our key assets and our client's the best guarantee.

Headquartered in Tres Cantos, Madrid, Spain. Leading distributors worldwide with a presence in such countries as Austria, Germany, Brazil, Belgium, Canada, China, Colombia, Denmark, Finland, France, , Italy, India, Luxembourg, Norway, Portugal, Sweden, Switzerland and the USA, among others.

Our top clients include AUDI, Bosch, Deutsche Post, ST-Ericsson, Metro de Madrid, PharmaMar, Repsol YPF, Rural Servicios Informáticos, Sistemas Técnicos de Loterías (STL), Telefónica, etc...
