Visure Solutions, spin-off of TCP-SI Requirements Tool Business Unit, will lead IRQA development & marketing worldwide

This new company, positioned as "The Requirements Company", will offer complete and specialized Requirements Management & Engineering solutions and services.

Madrid, October 15th, 2007 – TCP-SI (www.tcpsi.com), leading Business and IT Processes consulting firm announces the spin-off of its Requirements tool (IRQA) Business Unit. The new company, named Visure Solutions, has the financial backup of Bullnet Capital II.

The TCP SI board of directors has taken this decision to strengthen IRQA's position in the regions where it is already present and promote it in new markets. "With the creation of the new company, and the financial and strategic independence this business model provides, we will be able to foster an international expansion of our key product. We are also very glad to be part of this alliance with Bullnet Capital, well-known investors, bringing together expertise and experience that will contribute to the success of the new company", said Enrique Garcia Alcazar, TCP-SI CEO.

IRQA delivers complete and integrated Requirements Management & Engineering (RM&E) solutions, providing all the users involved in system definitions a unique environment with the necessary features to ensure a complete and consistent requirements specifications.

The team has been working on the most ambitious product roadmap, which will be reflected in the release of IRQA 4. This new version will deal with the existing need to find a tool that facilitates the implementation of complex corporate Requirements Management & Engineering processes, while providing a high level of usability and ease of use. This release is intended to help reduce costs through reusability, supporting product families, variants and requirements reuse, inviting users to migrate from the "document" management, to explore the engaging experience of a new generation of information centric requirements tools. At the same time, this approach helps establish an integrated management with the rest of the engineering processes.

Currently, Requirements Management & Engineering is a fast-growing discipline. There is an increasing awareness of the importance of an efficient requirements process and the need to implement it as part of the complete development process. However, it is a complex discipline, difficult to be adopted by suppliers without the required specialization to guarantee the highest quality in their products and services.

Visure Solutions (www.visuresolutions.com) to be called "The Requirements Company" is born with the purpose of becoming a technological leader specialized in Requirements Management & Engineering.

The state-of-the-art features of IRQA, widely used by leading companies worldwide, and the team's expertise in the development, marketing and implementation of the product, are the main assets of the company. "The spin-off is a strategic and logical step for IRQA. It is an important stride to strengthen our position in the market and become a technological leader. We will continue investing in innovation to be able to combine inside IRQA the newest and most relevant RM&E techniques. On the other hand, customer orientation will continue being one of the fundamental values in the company, reinforcing the professional services necessary to guarantee an adequate team training, process improvement and tool deployment", said Baldo Rincón, Visure CEO.

From now on, Visure will reinforce its international presence, committing to offer "state-of-the-art" solutions in the field of RM&E that will help customers reach the highest levels of quality in the development of the systems and applications.
